2015 SOAR Board Meeting

Submitted by jalias on Fri, 2015-09-11 12:42

The SOAR Board held its annual face-to-face budget meeting in La Serena on September 3-4. Aside from approving the budget and staffing levels for FY 2016, the Board set priorities for funding telescope and instruments improvements, and related activities - look for updates as these projects progress. In addition, the Board is reviewing the available instrument suite as current instruments age and new instruments become available - see the related article.
