## Uploading PAM files to the SOAR Laser Clearing House Software

1) Download the PAM file from <u>www.space-track.org</u>. [1]

- Login with the appropriate credentials
- Click on "Files" in the upper dark grey bar. Then on the "Download" tab, then on the zLCH folder, then on SAM\_SOAR, and then on PAM. You will end up with something like the screenshot shown below in Fig.1. Download the appropriate PAM file(s).

PAM_SOAR_SAM_1_T-1_22Sep2016_For_JDAY267_RADEC.txt •		
PRM		

**2)** Copy the PAM file(s) to a file with the following sintaxis: PAM\_YYYYMDD.txt. If you have more than one PAM file, add "-N" to the name, where N is an integer. For example, if your downloaded PAM file is PAM\_SOAR\_SAM\_1\_T-1\_15SEP2016\_For\_JDAY260\_RADEC1.txt you will copy it to PAM\_20160916-1.txt, since JDay 260 = Sep 16, 2016. The "-1" means that for that night we had more than one PAM file, i.e., there was a PAM-20160916-2.txt file.

**3)** Upload the PAM\_2016MMDD-N.txt file(s) to the /home/PAM/ directory in the soaraom computer, using the appropriate user and password:

scp PAM20160916-1.txt USER@soaraom.ctio.noao.edu:/home/PAM/

4) Load the PAM files into the LabView SLCH software in soaraom (Fig.2)

Figure 2.SLCH software main window. Files are uploaded by click on the small folder icons.
